# *Fiddes Hard Wax Oil*

## Aftercare

### Regular Cleaning

For day to day cleaning, surfaces treated with *Fiddes Hard Wax Oil* can be dry wiped, swept or vacuumed.

### Deep Cleaning

To clean surface scuffs, marks and stains, use Fiddes Floor Surface Cleaner and a damp (not wet) microfibre cloth or mop.

**Please Note:** Although Fiddes Cleaner is named 'Floor Surface Cleaner' it can be used on any surface treated with Fiddes Hard Wax Oil including floors, furniture, table tops and kitchen worktops.

Alternatively, Fiddes Wood Surface Cleaner Spray can be used on these other surfaces.

Oiled or waxed floors and surfaces should not be cleaned with a steam cleaner or steam mop as these can degrade or strip the finish and potentially damage the floor.

### Repair

Scuffs, stains, marks and minor scratches can be quickly and easily repaired.

- **Minor blemishes** can be removed by buffing with a cloth or brush as well as vacuuming
- **Light damage** such as stains can be easily repaired by lightly sanding and re-applying a fresh coat of Hardwax Oil
- **Heavy damage** including scratches can be easily 'repaired' by sanding the affected area, back to the bare wood if necessary and re-applying a fresh coat of the Hardwax Oil

For an all-in-one floor repair and maintenance solution, try Fiddes Floor Reviver Kit.

# *Fiddes Wood Surface Cleaner Spray*

## Overview

**Fiddes Wood Surface Cleaner** is a rinse free, pH-neutral cleaner, ideal for the daily cleaning and maintenance of interior wooden worktops, floors and furniture that have been previously treated with a hard wax oil, varnish or lacquer.

- As an alternative cleaner for wooden floors, try Fiddes Floor Surface Cleaner

## Preparation

Ensure that surfaces to be cleaned are sound, dry and free from any loose dirt and grit before cleaning with Fiddes Wood Surface Cleaner.

## Application

1. Spray *Fiddes Wood Surface Cleaner* lightly and evenly onto the wood surface to be cleaned

2. Wipe away with a clean, lint-free cloth
